Experience

user experience designer

jp morgan chase & co.
june 2022 - current

Service Design & Systems Thinking

- Mitigated ~3M returned debit cards and saved ~\$ 2.8MM annually by identifying a critical service design opportunity; conducted 30+ stakeholder interviews and end-to-end service blueprinting across customer, servicing, fulfillment, and digital channels to drive the solution to production.
- Produced target-state decisions, system-of-record ownership, and an execution-ready action plan under tight timeline constraints by serving as sole lead designer on a multi-LOB tax maintenance modernization initiative; built a 51-use-case information architecture catalog and current-state user flows that aligned ~85 cross-functional stakeholders.
- Reduced specialist cycle time from 2–3 weeks to ~15–20 minutes by defining a scalable target-state operating model for interest rate and promotional pricing configuration modernization; produced service blueprints, a business rules inventory, and facilitated 3 cross-org alignment workshops to establish domain ownership boundaries.
- Accelerated decision-making and drove alignment across complex, multi-LOB initiatives by planning and leading multiple design sprints, alignment workshops, and cross-functional working sessions with senior leadership and partners across operations, product, technology, and design.

UX Design & Prototyping & Interaction Design

- Influenced executive roadmap decisions toward a ~\$50B deposit share opportunity by designing and facilitating a week-long design sprint for a net-new account partitioning feature; user-researched solutions hold potential to grow Chase's share of primary deposit relationships from 34% to 50% among target customers, delivered through competitive analysis, near-term UX designs, and north-star prototypes.
- Replaced a manual email and verbal client reassignment process with a real-time, auditable Salesforce CRM workflow affecting 10M& customer records by designing a 0-to-1 interaction model; delivered annotated handoff in 2 weeks.
- Improved operational efficiency by ~50% and established the interaction patterns and mental model adopted in the final shipped product by designing complex eligibility-driven UX for a private banking program; solved multi-layered relationship information architecture problems spanning joint accounts, trusts, and business entities.
- Strengthened product decisions and reduced development risk by leading and supporting usability testing, focus groups, and user research sessions across multiple product teams; synthesized findings into actionable recommendations adopted by cross-functional partners.

student course designer & accessibility intern

ohio state's office of distance education & e-learning
jan 2019 – oct 2021

- Completed accessibility, copyright, and academic integrity reviews for online courses including alt-text, closed captioning, color contrast, page layouts, and cross-platform performance.
- Built courses from scratch using Canvas and HTML; managed tasks using Jira and Agile methodologies.

visual design & ui/ux intern

red ventures / puerto rico (rvpr)
june 2021 – aug 2021

- Designed screens for two brand sites using design systems in Figma.
- Engaged in end-to-end UI/UX processes from initial sketches through wireframing and prototyping in collaboration with multidisciplinary teams.

Expertise

core methods

- service design
- service blueprinting
- journey mapping
- information architecture
- facilitation
- design sprints
- user research (generative/evaluative)
- interaction design

tools

- figma
- lucidchart/lucid Spark
- ai: vs code, claude code
- salesforce design system
- adobe creative suite
- ux writing/content design
- prototyping
- user flows
- basic html/css

domains

- financial services ux
- operational ux
- agentic/automation ux
- crm/internal tooling
- customer experience

development

- oxford university ai certificate
